

Full Portfolio Build Prompt — Chandu Manjula, UI/UX Designer

Use this prompt to regenerate or hand off the portfolio exactly as built: a single-file, dark-mode, cinematic HTML/CSS/JS site using GSAP for animation. No framework required — plain HTML, CSS custom properties, and vanilla JS + GSAP/ScrollTrigger via CDN.

OVERALL DIRECTION

Build a premium, minimal, editorial, cinematic, dark-mode-first personal portfolio for a UI/UX Designer named **Chandu Manjula**. Single self-contained HTML file. Style: strong typography, generous whitespace, restrained motion, one accent color — not a generic template.

DESIGN TOKENS

Colors

- Background: (● #08080A) (near-black), secondary surface (● #0E0E11)
- Text (ink): (□ #F3F2ED) (off-white)
- Muted text: (□ #8B8B92)
- Panel / card background: (● #131316), hover panel: (● #17171B)
- Border / divider lines: (● #232327)
- Accent (restrained, warm gold): (● #C9A15A) — used only for labels, hover states, active states, and CTAs

Typography

- Display / body font: **Inter** (weights 400–900)
- Monospace (labels, metadata, numbers only): **JetBrains Mono** (400–500)
- Section headings: extremely large, bold (800–900 weight), uppercase, tight letter-spacing ((-0.02em) to (-0.03em))
- Small uppercase mono labels with a colored dot bullet mark every section eyebrow (e.g. (● // ABOUT ME))

Layout

- Max content width: 1240px, 40px side padding
 - 8px-based spacing rhythm
 - Desktop-first, fully responsive down to mobile (single column, stacked cards)
 - Subtle atmospheric background: two soft radial gradients (gold top-right, cool blue-violet bottom-left) fixed behind all content
-

NAVIGATION

Sticky top nav, transparent by default, gains a blurred glass background (`backdrop-filter: blur`) and a bottom border once the page scrolls.

- Left: **Chandu Manjula**
 - Center/right links: Home · About · Expertise · Skills · Projects · Certifications · Contact
 - Active section link underlines/highlights via IntersectionObserver as the user scrolls
 - Right: **View Resume** pill button linking to an attached resume PDF
-

HERO SECTION

Full-viewport height, two-column grid (text left, portrait right).

- Small eyebrow label: `HI, I'M CHANDU`
 - Giant two-line uppercase headline: "UI/UX" / "DESIGNER" — each line reveals with a staggered slide-up + fade-in on load (mask each line with `overflow: hidden`), animate the inner span from `translateY(110%)` to `0`
 - Supporting sentence to the side: *"I design intuitive digital experiences that balance user needs, business goals, and visual clarity — across mobile, web, and editorial products."*
 - Two CTAs: **View My Work** (filled gold pill) and **Contact Me** (outlined pill)
 - Right side: a portrait card (rounded 24px frame, soft gold glow behind it) containing the designer's real photo, with a small location tag overlay: `Bengaluru, India`
 - Bottom-left scroll indicator: a thin animated line + `SCROLL TO EXPLORE` label
-

ABOUT SECTION

Editorial two-column layout (image left, content right).

- Left: portrait inside a rounded dark frame (reuses/echoes the hero photo)
- Right: label `// ABOUT ME`, heading `Hello, I'm Chandu`
- Body copy (real, from resume): fresher UI/UX designer, strong foundation in visual design and user-centered thinking, focused on real-world Indian contexts (travel discovery, healthcare access), Figma-based workflow, open to internship and full-time roles, based in Anantapur, Andhra Pradesh
- Three compact info cards below, each with an index number, title, and one-line description:
 1. UI/UX Design — wireframing, prototyping, visual design, design systems
 2. Design Thinking — user flows and information architecture
 3. Attention to Detail — visual consistency, accessibility, layout principles

- Cards lift slightly and their border turns gold on hover
-

EXPERTISE SECTION

Label `// DESIGN EXPERTISE`, heading `Core Design Capabilities`.

Five cards in a row (stacks to one column on mobile), each with a large mono-styled number, title, and short description. Cards fade/slide in staggered on scroll (GSAP ScrollTrigger), lift on hover with a gold border:

1. UX Research
 2. Wireframing
 3. UI Design
 4. Design Systems
 5. Prototyping
-

SKILLS SECTION

Title `TOOLS & SKILLS`. Four skill groups shown as labeled columns of pill/chip tags (each chip lifts slightly on hover):

- **UI/UX Design:** Wireframing, Prototyping, Visual Design, Design Systems
 - **Figma:** Auto Layout, Components & Variants, Interactive Prototyping
 - **Design Thinking:** User-Centered Design, User Flows, Information Architecture
 - **Research & Craft:** Competitor Analysis, Informal User Feedback, Accessibility, Visual Consistency
-

PROJECTS SECTION

Title `SELECTED WORK`. Large horizontal project rows (not small thumbnails) — image on one side, detail on the other, alternating sides row to row. Each row fades/slides in on scroll. Image zooms slightly on row hover.

Each project card includes: number tag, real cover/mockup image, title, 2-3 sentence description, a metadata grid (Role / Tools / Category / Focus), and a "View case study on Behance ↗" link.

Project 01 — TravelCare

- Healthcare access app for solo travellers/backpackers: verified doctors, transparent pricing, full flow from onboarding through booking, consultation, e-prescriptions, and payments
- Role: UI/UX Designer · Tools: Figma · Category: Mobile App · Focus: Healthcare access

Project 02 — Andhra Hidden Trails

- Independent editorial travel guide for budget-conscious explorers; full editorial design system with a signature "Field Ledger" cost-transparency format
- Role: UI/UX Designer · Tools: Figma · Category: Web / Editorial · Focus: Travel, cost transparency

(Only real, shipped projects — no invented/placeholder case studies.)

PROCESS SECTION — "HOW I DESIGN"

Two-column layout: a vertical list of 5 stage names on the left, a sticky detail panel on the right.

Stages: **01 Discover** → **02 Define** → **03 Ideate** → **04 Design** → **05 Test**

As the user scrolls, GSAP ScrollTrigger detects which stage is centered in the viewport and updates the sticky panel's label, title, and description accordingly; the active stage name in the list turns gold.

CERTIFICATIONS / EXPERIENCE SECTION

Vertical timeline with a thin connecting line and small gold dot markers per entry.

- Real entry: **Bachelor of Technology (B.Tech)**, Annamacharya Institute of Technology & Science, 2022–2026, CGPA 8.12
 - One dimmed placeholder entry inviting future certifications/internships to be added
-

CONTACT SECTION

Large dramatic multi-line uppercase headline: **LET'S BUILD / SOMETHING / MEANINGFUL.**

Supporting line: *"Have a project, opportunity, or idea? Let's talk."*

Buttons: **Email Me** (mailto, filled gold), **Behance** (outlined, opens profile)

Simple contact form (Name / Email / Message / Send Message) — no backend; on submit, JS builds a **mailto:** link pre-filled with the form contents and opens the user's email client. Small note under the form clarifies this.

FOOTER

Minimal: name + role on the left, Navigation and Social link columns on the right, bottom row with copyright and location.

ANIMATION RULES

- All motion via GSAP + ScrollTrigger, timings 300-800ms, smooth easing (`power2.out`), `power3.out`), no bounce
 - Respect `prefers-reduced-motion`: disable all animation and show final states immediately
 - Hero headline: staggered line reveal on load
 - Cards (expertise, projects): staggered fade + slide-up on scroll-into-view, once only
 - Hover only: card lift + border color shift to accent, chip lift, image zoom on project hover
 - Process section: scroll-synced stage highlighting, not time-based
-

CONTENT SOURCE OF TRUTH

All copy must come from Chandu's real resume and Behance profile — no fabricated projects, employers, or certifications. Placeholder slots are allowed only where explicitly marked as "add your own" content.
